

# In Memory of

**Am/Can Ch. Royal Hill Sterling Silver, CGC, CD, TDI, TC, U-CD  
July 17, 1995—January 29, 2007**

Tiffany, Am/Can Ch. Royal Hill Sterling Silver sadly lost her battle with Hepatocellular Carcinoma on January 29, 2007. Tiffany was just 11 1/2 years old. Tiffany was just diagnosed with this condition last week. We were told she would only live a month or two, but the disease progressed very rapidly and she wasn't doing very well.

I was with Tiffany at her birth and held her in my arms as she passed from this life. Mike and I were both with her. We will miss her dearly.

Tiffany finished her championship at just 10 months of age. She was shown by Julie Desy. Tiffany loved to play ball and would

bring a ball or toys to anyone that would come to visit. She loved making everyone happy and having fun with them. Our home feels so empty with her. Tiffany was involved as a therapy dog. She did therapy with the Delta Society and the Intermountain Animal Therapy dogs. Her love of people made her a natural at being a therapy dog. She loved being a therapy dog and really loved being with the children and playing with them while cheering them up. All the kids would come up to her and hug her and play ball or toys with her and Tiffany loved it and wouldn't stop or give up even when she was very tired. All she wanted to do was make everyone happy.

Tiffany taught me how to bond with children and other people. I have learned so much from her. Our home just doesn't feel right now without her here.

Tiffany will always live in my heart and will be with me. I love her very much she was like my own daughter. We miss her dearly. There is no other dog that will ever replace her. She will always be in my heart no matter what, and even though she is gone, she will always be with me.

Rest peacefully our beautiful blue girl.

Loved but not forgotten by Linda, Mike and Jason Cornella
